PROFILE

Product-minded Full-Stack Engineer with strong ownership of user-facing features and a focus on clarity, usability, and real-world impact. Experienced in translating ambiguous requirements into clear interfaces and working end-to-end from problem understanding to implementation. Comfortable in early product environments where engineering quality, performance, and collaboration with design and product matter equally.

CORE STRENGTHS

- Owning features end-to-end (problem → solution → delivery)
- Clarifying unclear requirements and improving usability
- Frontend-heavy full-stack development
- UX-aware, accessible UI implementation
- Working independently in ambiguous environments

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS, Accessibility

Backend: Node.js

Databases: MySQL, MongoDB

Tools & Libraries: Git, GitHub, Postman, Figma, Firebase, Prisma

Advanced 3D/WebGL used in projects, not core role identity

EXPERIENCE

Everest Solutions GmbH — Working Student, Developer

Apr 2022 - Jul 2024 · Remote

- Owned and shipped user-facing features using React and TypeScript in an Agile product team
- Designed and built a GitHub-style tagging system to improve content discovery and workflows
- Improved performance and maintainability through modular component design
- Worked closely with developers to clarify requirements and deliver features incrementally

CibusCell Technology GmbH — Working Student, Developer

Nov 2021 - Mar 2022 · Remote

- Built responsive frontend components for a modular energy platform
- Integrated REST APIs and supported full-stack feature delivery
- Contributed to shared UI patterns and cross-module consistency

CodeTantra Tech Solutions Pvt. Ltd. — Product Development Engineer

Dec 2020 - Apr 2021 · Remote

- Developed user-facing flows for an online exam monitoring platform
- Integrated real-time WebRTC components for live learning environments
- Resolved production issues to improve platform stability

STARTUP EXPERIENCE

Early-Stage Startup — Founding Engineering Team (Part-Time)

- Took high ownership in a fast-moving, resource-constrained startup environment
- Contributed to early product development in a pre-seed startup environment
- Built core features and supported rapid iteration under limited resources
- Worked closely with founders to translate product ideas into working software

PROJECTS

Gaussian Splatting Scene Editor — Product-Oriented Web Tool (Master's Thesis)

Babylon.js · TypeScript · WebGL

- Building an interactive web-based editor for large 3D Gaussian datasets
- Designed workflows for multi-file upload, object selection, and transformations
- Implemented dataset merging, metadata handling, and performance-aware rendering
- Developed as a product-like tool with focus on usability and clarity

Personal Portfolio & Blog Platform

React · Tailwind CSS

- Designed and built a personal portfolio focused on clarity and recruiter usability
- Implemented responsive layouts and structured storytelling

Task Manager Web App

React · Node.js

- Built a productivity app to apply core React and state management concepts
- Implemented CRUD operations, filtering, and persistent state

EDUCATION

University of Kaiserslautern — M.Sc. Computer Science (2021-Present)

Master's Thesis: Interactive Scene Editor for Gaussian Splatting

Marwadi University — B.Tech Computer Science (2016-2020)

GPA: 8.74 / 10

LANGUAGES

English (Fluent) · German (Basic)
